Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including a controller that generates an operation command to a predetermined object for being controlled related to purifying of the exhaust gas on the basis of the detected concentration which is the concentration of the reducing agent or the precursor detected by the concentration sensor, wherein the controller determines whether or not the aqueous solution of the reducing agent or the precursor in the storage tank is in a stationary state and, at a stationary time when it is determined to be in a stationary state, permits sensing of the concentration by the concentration sensor, while at a shaking time other than the stationary time, prohibits the sensing of the concentration by the concentration sensor, and wherein the concentration sensor detects the concentration of the reducing agent or the precursor only at the stationary time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Applicant's arguments, see Page 2, lines 5-25; and Page 3, lines 1-23, filed March 04, 2008, with respect to Claims 1, and 15 have been fully considered and are persuasive. Accordingly, the Office Action mailed on October 31, 2007 has been withdrawn.
